TO ARCHITECTS.—Frequent complaints having been made by ARCHITECTS and others, of the failure of certain works supposed to have been done by this Company (but which in fact were executed with spurious materials), a list of all works executed with the genuine SEYSSEL ASPHALTE is kept at the Office, that it may be at any time ascertained whether any work in which a failure has taken place was executed by the Company. J. FARRELL, Secretary.

SEYSSEL ASPHALTE WORKS, Stangate, London.

ESTABLISHED 1838.

N.B. The exclusive supply of Asphalte from the Mines of Pyrimont Seyssel having conceded to this Company, the Directors particularly recommend Architects, Builders, and others (for the purpose of securing the use of the genuine article) to insert in their specifications "SEYSSEL ASPHALTE, CLARIDGE'S PATENT," and not merely "Asphalte," or "Bitumen," as in many cases where these terms have been used, pine-tar, and other worthless and offensive compositions have been introduced.

1852.

STOCK & SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to facilitate the introduction of sanitary improvements into the dwellings of the working classes, by the adoption of such an arrangement of cheap soil-pan apparatus as will enable the "constant supply system" of water service to be made available for the removal of the refuse, by preventing the enormous waste of water in places of this description, to which water companies now so strongly and so properly object. By the use of this service-box an ample supply of water is obtained, without the possibility of its being wasted, by propping the valve, weighting the handle, or by other means. It is so constructed that, as long as the discharge-valve remains open, a further supply cannot enter the apparatus from the main. Drawings and descriptions may be obtained from STOCK and SON, Manufacturers of Plumbers' Brass-work, Stanhope Street, Rotary Screw-down Taps, Fire Plugs, Gas Fittings, and Church Furniture in iron and brass, Temple-street, Birmingham.

SUPERIOR GLAZED STONEWARE DRAIN PIPES, invented and manufactured by

WILLIAM NORTHEN, UNION POTTERY, No. 14, VAUXHALL WALK, LAMBETH.

W. NORTHEN begs to inform surveyors, contractors, builders, water companies, &c. that he has completed "Spencer's" new patent machinery for making GLAZED STONEWARE DRAIN PIPES, JUNCTIONS, BENDS, ELBOWS, SYPHON-TRAPS, &c. &c. Amongst the many advantages of pipes made by this machinery over all others may be mentioned, that it insures perfect uniformity in form and size, both of pipes and sockets, the dies being of a different and better construction than any others now in use; and the pipes and sockets being made by one process are secure from separation.

W. N. invites particular attention to the superior quality of the glaze used in his manufacture, which is equal to glass, and rendering stoppage in the drains impossible.

W. NORTHEN'S PIPES MAY BE INSPECTED AT THE FOLLOWING PLACES, WHERE ORDERS ARE RECEIVED:—

Rember and Cab's Wharf; Kingsland, Blackfriars, and Millbank.—Martin and Wood's Market Wharf, Regent's-park Basin.—J. C. Hilliard's, Crown and Horseshoe Wharf, No. 9, Upper Thames-street.—W. Pulsford, North Wharf, Paddington.—C. Richardson's, South Wharf, ditto.—G. Erith's, Cambridge Heath Wharf, Hackney.—W. Parry's, Canal Bridge, Old Kent-road.—Millwood and Co.'s Wharfs, Kensington Basin, and Creek Wharf, Hammersmith.—J. Corbett's Depôt, Britton-street, Chelsea; and at the Pottery.

REDUCTION of PRICE in UNGLAZED DRAIN PIPES.

Manufactured by CHAR. FRANCIS and SONS, NINE ELMS.

The prices in future will be,

3in. 2½d. per foot for the 3 inch bore.		
4in. 3d.	"	4 "
5in. 3½d.	"	6 "
6in. 4d.	"	8 "
9in. 8d.	"	12 "
12in. 12d.	"	18 "

These pipes are made under steam pressure, and burnt to great hardness, and are capable of bearing nearly double the hydraulic pressure of ordinary glazed pipes. The prejudice against red-ware is overcome by this manufacture. And it is well known that good earthenware, UNGLAZED, is the oldest material discovered in a perfect state in Rome, Babylon, Nineveh, &c. &c.
